

PROJECT 5

Ukraine, Lisichanck

Construction of biogas plant
with capacity of up to 80 tons/day
2010

Space and arrangement design:

Biogas plant pavilion is 1-storeyed, circular-type with a rectangular additional building for a workshop and warehouse. Supporting construction includes a number of metal welded frames with flanged connections and cable-stayed ties. Building envelope is made of polycarbonate panels and metal heat insulated sandwich-panels. Roofing system - rolled roofing material.
